Project Video

Type of the Deliverable: DEC – Websites, patent filings, videos, etc.

Deliverable D11.3 consists of the first EASTGATEH2V project video, developed during the deployment phase of the project.

The video presents the current state of play of the project, the concept of the EastGate Hydrogen Valley, its main components and expected impacts. It introduces the planned hydrogen production, distribution and end-use ecosystem in the Košice region and explains how the different elements of the Hydrogen Valley are intended to be interconnected.

The video is designed for a broad public audience and combines real footage from the region with explanatory graphics and animations.

Due to the file size, the video is not embedded in this document.

The final video is available here: https://youtu.be/DYJulk1HYY4
